Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

patentdocket@oblon.com oblonpat@oblon.com jgardner@oblon.com

Application No. Applicant(s) 10/575,760 KLUMPE ET AL. Office Action Summary Examiner Art Unit ROSALYND KEYS 1621 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 14 October 2008. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1.2 and 5-10 is/are pending in the application. 4a) Of the above claim(s) _____ is/are withdrawn from consideration. 5) Claim(s) _____ is/are allowed. 6) Claim(s) 1.2 and 5-10 is/are rejected. 7) Claim(s) _____ is/are objected to. 8) Claim(s) _____ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Status of Claims

- 1. Claims 1, 2 and 5-10 are pending.
 - Claims 1, 2 and 5-10 are rejected.
 - Claims 3 and 4 are canceled.

Response to Amendment/Arguments

 Rejection of claims 1, 2 and 5-10 under 35 U.S.C. 103(a) as being unpatentable over Ruland et al. (WO 03/091190 A1, which is equivalent to US 2005/0170991 A1) is withdrawn due to the amendment to claim 1, which limits the alkoxylate mixture to one consisting of alkoxylates of the formula (I).

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claims 1, 2, and 5-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The instant specification does not describe an

Application/Control Number:

10/575,760 Art Unit: 1621

alkoxylate mixture which *consists* of alkoxylates of the formula (I). The specification only provides support for an alkoxylate mixture comprising alkoxylates of the formula (I). In addition claims 5 and 6 contain the limitation "a parent alcohol", which was added in the amendment filed October 12, 2007. However, the specification only provides support for the parent alcohol C₅H₁₁CH(C₃H₇)CH₂OH.

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be neadtived by the manner in which the invention was made.
- 6. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - Resolving the level of ordinary skill in the pertinent art.
 - Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Application/Control Number:

10/575,760 Art Unit: 1621

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

 Claims 1, 2 and 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruland et al. (WO 03/091192 A1, which is equivalent to US 7,371,716 B2).

Ruland et al. suggests the claimed alkoxylate mixture, process for preparing said alkoxylate mixture, and claimed uses of said alkoxylate mixture (see entire disclosure of US 7,371,716 B2, in particular column 1, line 58 to column 8, line 22, example 10 and the claims). Ruland et al. suggest an alkoxylate mixture of the formula (I) and in particular teach an alkoxylate mixture comprising 70 to 99% by weight of alkoxylates A1, in which C₅H₁₁ has the meaning n-C₅H₁₁ and 1 to 30% by weight of alkoxylates A2, In which C₅H₁₁ has the meaning C₂H₅CH(CH₃)CH₂ and/or CH₃CH(CH₃)CH₂CH₂ (see column 1, line 58 to column 2, line 14).

Ruland et al. differ from the claimed invention in that Ruland et al. do not specifically disclose an alkoxylate compound having the claimed formula I where A (ethyleneoxy) and B (propyleneoxy) are present in the form of 4 blocks in the stated sequence. However, Ruland et al. is suggestive of such an alkoxylate, since Ruland et al. teach that variations in the distribution of the building blocks along the polyether chain arise on the basis of different reaction rates of the components and can also be achieved voluntarily through the continuous introduction of an alkylene oxide mixture of program-controlled composition (see column 5, line 41 to column 5, line 42).

Application/Control Number:

10/575,760 Art Unit: 1621

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROSALYND KEYS whose telephone number is (571)272-0639. The examiner can normally be reached on M, W, F 8 am-3:30 pm; T, Th 5:30 am-7 am & 9:30 am-5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Sullivan can be reached on 571-272-0779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
